

## Description

Thames W-Absorber was designed specifically for the broadcast market. This large scale panel is perfect for wall-to-wall, high quality sound absorption, used to create high-fidelity recording and listening environments. Developed around our FixArt Tube mechanical installation system, the panels is fully decoupled from it's mounting surface, increasing it's efficiency not only from the resulting air gap, but also in stopping structural vibration that can be problematic in multiple use recording studios. It's installation system drastically simplifies studio design, with an accessible cavity allowing for cabling, or surface mounted amenities. Available in a selection of high quality lacquered and wood finishes. Thames is the future of studio design.
